## Series 1100 Electrification.

Transverse cable channel consists of two powder-coated round-steel tubes with clipped-on three-chamber chain links and removable perforated-metal screens. The three-chamber chain links are of flexible plastic for guiding separate cables. The transverse cable channel is attached to the Power-Lift post.

One-part, vertical cable chain (21153) of round four-compartment chain links made from flexible plastic for separate cable routing, movable in all directions. For suspension at the top in the mesh duct of the table top, with arctic-colored floor plate at the bottom.

Two-part, vertical cable chain (21154) of rectangular four-compartment chain links, movable in two directions. For suspension at the top in the mesh duct of the table top, in the middle in the cable duct cross-member, and with arctic-colored floor plate at the bottom.

Four-way power socket with 3m of cable (H05W-F3G) and angled plug. With VDE test mark.
