Series 800 Wall and ceiling closer panels.

Wall and ceiling closer panels are available in melamine-resin-coated chipboard with glued-on plastic or beech edges. Panels flush with the front are fitted to match the cabinet grid widths with an 8 mm joint, panels flush with the body are fitted with a hairline joint. The panels are adapted to the structural body.

The following material groups are available to choose from: Front made of chipboard: L3; Front veneered: F1.

Series 800	48519	48520	48521	48522	48523	48524
