## Shift+ FusionFlip Folding table.

Designed with a centrally positioned tubular steel cross-piece with an articulated bracket. The table can be folded using a two-handed safety mechanism under the tabletop. It has a fitting to secure the table in both the horizontal and vertical positions.

Frame consisting of two curved, powder-coated steel tubes and four lockable castors.

Table heights according to DIN EN 1729.

Function. When the top is tilted upwards, any number of tables can be pushed together to save space.

Tabletop made from melamine resin or laminate-coated LIGNOpal chipboard with glued plastic edge or high-strength solid HPL top. All with round corners.

The following material groups are available to choose from: Frame made of steel: M1; Top made of chipboard: L4; HPL-top: L4; Chipboard with laminate: L9.
